Subject RE: GIS Shape File Still Needed

Hi Kathy,

I contemplated sending the GIS coverage of the boundary with the maps
last Thursday - it is attached.

The projection information is: UTM NAD 1983, Zone 12.

Let me know if you need anything else.

Thanks,
Jon

Subject: Re: GIS Shape File Still Needed

Kathy - Apparently we still don't have the GIS file that was used by
your contractor to establish the boundary for the Lower Silver Creek
properties that are now part of Richardson Flat. I want to be sure not
to include areas that don't need to be included in my PRP Search. It
would be awful to send out 104(e)s and notice letters to parties that
you don't consider within the site boundary. Can we try again?

Here is what my GIS expert tells me:

Maureen - This is a .pdf; it's basically the same as the last one. I

can't use a .pdf. I need a "shapefile" (which is actually 4 files: filename.shp, filename.dbf, filename.sbx, filename.prj).

We could create a shapefile from the lat/longs on the .pdf but it obviously would not include alll of the details of the boundary; it would end up as an oblong, worse than just trying to draw it on the screen.

"The single biggest problem in communication is
 the illusion that it has taken place."
 - George Bernard Shaw
